## Foundational Progress Monitoring Training

Bay-Arenac ISD utilizes a progress monitoring system within Edplan to meet obligations for documenting progress on goals and objectives. As part of this continued implementation, the ISD is offering a virtual session for special education teachers and staff to attend. This training will cover the foundations of progress monitoring, along with the requirements and use of the progress track system. Progress Track entries will be required to finalize an IEP and as part of ongoing monitoring for compliance.

\*If you are an educator in a district or ISD outside of BAISD or IRESA, additional fees may apply.
